

Dear Early Years, Grade 1, Grade 2 Parents and Guardians,

We would like to inform you that the dental and oral hygiene awareness session and screening were conducted yesterday by ***Kids Airline Pediatric Clinic*** for students whose parents had provided approval.

Kindly check your child's school bag for the screening report, which includes the results and any recommended follow-up, if required.

We appreciate your continued support at home in encouraging effective toothbrushing habits twice daily (morning and evening) and limiting the consumption of sugary, particularly sticky foods.

Maintaining regular dentist check-ups and a good oral hygiene are essential for a child's overall health and development. It helps prevent tooth decay, pain, and infections, and also supports learning and reading, especially when dental issues related to bite alignment are present.

Thank you for your continued trust, cooperation, and support.

Best regards,

Carole Francis
